

SYED ATIF ALI

✉ atif1712001@gmail.com  github.com/Atif-1

Professional Summary

Results-oriented Software Developer with 1 year and 8 months of experience specializing in the extension and optimization of large-scale SaaS and ERP platforms for the education sector. Proven expertise in analyzing legacy codebases to engineer high-impact modules, including a comprehensive Library Management System and automated Document Generation workflows. Successfully resolved 20+ critical production issues, achieving a 99% reduction in server crashes through strategic debugging and database optimization. Skilled in managing end-to-end server operations, from VPS administration to MySQL database integrity, while leveraging AI-assisted workflows to accelerate feature delivery in Node.js, React Native, and Express environments.

Technical Skills

Languages: JavaScript (ES6+), TypeScript, SQL, Java, HTML5, CSS3

Backend: Node.js, Express.js, REST API Design, JWT Authentication, Server-side Logic

Databases: MySQL, Sequelize ORM, Schema Design, Query Optimization

API & Tools: Postman, Git, GitHub, JSON Handling, AI Prompt Engineering

Cloud & DevOps: AWS (EC2, RDS, S3), VPS, Render, CI/CD

Professional Experience

Associate Software Engineer

Oct 2024 – Jun 2026

Company Name (Amtech Softwares)

Remote

- **ERP Module Development & Extension:** Engineered and deployed critical new functionalities for an established School Management ERP SaaS, including the full lifecycle **development of the Library Management Module** (book cataloging, issuance/return tracking, and reporting).
- **Feature Implementation:** Designed and integrated dynamic features such as Gate Pass creation, DOB Certificate generation, and customized Report Card layouts, enhancing the platform's utility for administrative staff.
- **System Stability & Debugging:** Diagnosed and resolved **20+ complex production issues**, including middleware routing errors, function execution bottlenecks, and **schema-code mismatches**. Implemented optimization strategies that **reduced server crashes by 99%**, ensuring high availability.
- **Server Management (VPS):** Oversaw VPS infrastructure, managing feature deployments, monitoring server health, and performing runtime debugging to maintain uninterrupted service for thousands of users.
- **Mobile App Enhancement:** Extended a React Native Android application by integrating the **PayU payment gateway** for secure fee collection and implementing **Firebase Cloud Messaging (FCM)** for real-time push notifications.
- **AI-Driven Workflow Optimization:** Utilized AI coding assistants to accelerate the debugging of legacy code, generate unit tests, and streamline the development of new API endpoints.
- **Reporting & Automation:** Developed robust backend logic for Daybook reports and App Notifications, automating manual processes and improving data accuracy for institutional reporting.

Projects

Expense Tracker App

[Link](#)

Full-Stack Web Application (Backend Focus)

Node.js, AWS, Razorpay

- Built a secure backend platform with **JWT-based authentication** and robust **CRUD operations**.
- Integrated **Razorpay API** for premium memberships and **AWS S3** for secure file storage and report downloads.
- Managed **database systems** using **MySQL** and deployed the application on **AWS (EC2, RDS)** once. Currently on **render**.

Education

Bachelor of Technology (B.Tech) in Electronics & Communication

2019 – 2023

University Name (AKTU)

Lucknow, UP

- **Relevance:** Completed degree with strong foundation in programming, data structures, and database management.

Interests

Video games, Chess
