

SUMMARY

Results-driven Full Stack Developer with 1.6 years of experience building and optimizing scalable ERP and management software. Expertise in Node.js, Express.js, MySQL, JavaScript, HTML, and CSS, with a focus on full-cycle development, RESTful API design, and third-party integrations. Proven track record of resolving critical bugs, enhancing system stability, and delivering end-to-end features that improve client productivity. Skilled in UI/UX redesign, database management, and leveraging AI tools to accelerate development. Adept at collaborating with clients to translate business needs into high-impact technical solutions

EXPERIENCE

Associate Software Engineer (Amtech Softwares)

Oct 2024-Present

Remote

- **Improved System Stability by 99%:** Diagnosed and resolved a critical server crash issue occurring every 10 days by implementing infrastructure optimization and real-time monitoring using Node.js and Chrome DevTools.
- **Delivered 10+ Full-Stack Features:** Developed end-to-end solutions including app notifications, gatepass generation, and name slips, enhancing client productivity and satisfaction.
- **Built Library Management Module:** Designed and implemented a full ERP feature for book cataloging, issuance tracking, and reporting using Node.js, MySQL, and Sequelize ORM, reducing third-party software dependency.
- **Enhanced Data Security:** Developed a one-click database backup system, empowering clients to secure data independently and reducing operational load.
- **Optimized Frontend UX:** Redesigned UI/UX using HTML, CSS, and JavaScript, improving responsiveness and user engagement across devices.
- **Integrated Key Features:** Added push notifications, payment gateway, and modules for student marks and attendance using React Native and AI-assisted development.
- **Client-Centric Development:** Collaborated directly with clients to gather requirements, debug issues (20+ resolved in <24 hrs), and deliver scalable features aligned with business goals.
- **Technologies:** Node.js, Express.js, MySQL, Sequelize ORM, HTML5, CSS3, JavaScript, jquery, bootstrap, React Native, RESTful APIs, Postman, GitHub, ChatGPT/Copilot

PROJECTS

School/College Management ERP System

Company Project

Full-Stack ERP Portal for Educational Institutions

- Enhanced a role-based ERP system with Admin, Branch Admin, and Branch User access levels to manage students, staff, accounts, and operations across multiple branches.
- Developed and deployed key features: app notifications, gatepass generation, staff/student ID cards, name slips, daybook, and one-click database backup.
- Built the full Library Management module from schema design to deployment, enabling book cataloging, issuance tracking, and reporting.
- Resolved critical production issues including function execution order, MySQL schema-code mismatches, and middleware routing errors.
- Reduced server crashes by 99% by identifying bottlenecks and recommending vertical server scaling.
- **Technologies:** Node.js, Express.js, MySQL, Sequelize ORM, HTML, CSS, JavaScript, bootstrap, jquery, VPS.

React Native Student & Staff Android App

Company Project

Mobile App for Educational ERP System

- Redesigned UI/UX across the entire React Native app, improving usability and visual consistency for 5,000+ users.
- Fixed critical bugs in the student module, restoring full access and functionality.

- Integrated PayU payment gateway to enable secure in-app fee payments.
- Implemented Firebase Cloud Messaging (FCM) to send real-time notifications by syncing FCM tokens with the server.
- Added Staff Login and developed modules for staff such as marks entry, homework, student attendance, and student complaints.
- **Technologies:** React Native, Firebase, PayU API, Android Studio, JavaScript, Chatgpt/Copilot.

Expense Tracker App

Personal Project [link](#) [github](#)

Backend-Focused Full-Stack Application

- Built a secure expense management platform with JWT-based authentication, CRUD operations, and pagination.
- Integrated razorpay for premium membership and AWS S3 for expense report downloads.
- Used Brevo (Sendinblue) for emails to enhance user engagement.
- Deployed on AWS (EC2, RDS, S3) for 6 months; currently hosted on Render.
- **Technologies:** Node.js, Express.js, MySQL, AWS, Razorpay, Brevo, HTML, CSS, JavaScript.

React.js Portfolio Website

Personal Project [link](#) [github](#)

Responsive Developer Portfolio

- Developed a responsive portfolio with 6 sections: Hero, About, Projects, Experience, Certifications, and Contact.
- Optimized for performance and mobile responsiveness using React.js and semantic HTML/CSS.
- Hosted on Vercel with a custom domain for fast load times and seamless deployment.
- **Technologies:** React.js, HTML, CSS, tailwindcss, JavaScript, Vercel.

TECHNICAL SKILLS

- **Languages:** JavaScript, TypeScript, HTML5, CSS3, SQL, Java
- **Frontend:** React.js, React Native, tailwindcss, Responsive Design
- **Backend:** Node.js, Express.js, RESTful APIs, MVC Architecture
- **Databases:** MySQL, Sequelize ORM
- **DevOps & Cloud** AWS (EC2, RDS, S3), VPS, Jenkins (CI/CD).
- **Tools:** Git, GitHub, Postman, Chrome DevTools, VS Code, ChatGPT/Copilot
- **Methodologies:** Problem Solving, Debugging, Performance Optimization

EDUCATION

Bachelor of Technology (BTech)

2019 - 2023

Electronics And Communication Engineering (ECE)

Shri Ramswaroop Memorial College Of Engineering And Management (SRMCEM || SRMGPC) (AKTU)

CERTIFICATION

Modernizing Java EE Applications -: By cognitiveai IBM (Jul 2020)

Completed a Java Certification. Covered Basics of Object-Oriented Programming with Java, its syntax, and application. [Certificate Link](#)
